Instructions: Read the text aloud.

Bungee jumping is an exhilarating sport which involves tying strong elastic cords to one's ankles and leaping from a high place like a tower or a bridge. The origins of bungee jumping can be traced to Pentecost Island in the South Pacific. Teenage boys proved they had reached manhood by tying vines to their ankles and jumping off specially-built towers. It must have been seen as a rite of passage in which they faced their fears just like their forefathers did in years gone by. After the jump, there was a gratifying celebration for all the inhabitants of the island with special ceremonies and a festive banquet. Satisfied parents would look on with pride as their sons were glorified. Bungee jumping might have been introduced to the western world by Captain James Cook, who discovered Pentecost Island in 1770. To this day, some of the best jumps in the world may be enjoyed from these cliffs.

In the past fifteen years, bungee jumping has found widespread success in America, Europe, and Australia. This may have been caused by increased accessibility. The way bungee jumpers enjoy their diversion has changed, though. They still jump from cliffs just as the original creators of the sport intended. But nowadays those looking for a more thrilling challenge also jump from special towers and even hot air balloons, from altitudes up to 150 feet (46 meters) above the ground. A free fall from that height must be quite an unsettling feeling!

In order to minimize the dangers, a jumper ought to be accompanied by an experienced partner, and a safety code, like that of the British bungee association, must be followed by all licensed bungee jumping clubs.

Adverbial Clause of Manner

An **adverbial clause** is a group of words which have the same function as an adverb. Like all clauses, an **adverbial clause** has a subject and a verb.

Adverbial clauses of manner are used to express how something happens. An adverb of manner often starts with a subordinating conjunction like **as**, **like** or **the way** ... to introduce the adverbial clause.

Example:

*Bungee jumpers still jump from cliffs **the way the original creators of the sport had intended**.*

*They see danger **as an unnecessary feeling that gets in the way of enjoying the jump into the void**.*

Examples:

- *Bungee jumping is an exhilarating sport which involves leaping from a high place like a tower or a bridge.*
- *They still jump from cliffs just as the original creators of the sport intended.*

Learning Points

Passive of Modal Verbs in the Present and Past

You use the **passive form of Modal verbs** to put the emphasis on the receiver of the action, and to suggest possibility, certainty, injunction or prohibition.

As with other verbs, the **passive form of modal verbs** puts the emphasis on the receiver of the action and not on the doer of the action.

Passive modal forms are often impersonal and do not require an object.

Example:

- *Bungee jumping **should be enjoyed** in a safe and responsible environment.*
- *Some of the best jumps in the world **may be enjoyed** from these cliffs.*

The Simple Present Passive

The structure of **Simple Present passive** for modal verbs is:
subject+modal verb+be+past participle of verb

You can use **Simple Present modal verbs** to convey a general obligation or permission.

The Simple Past Passive

The structure of **Simple Past passive** for modal verbs is:
subject+modal verb+have been+past participle of verb

Example:

*Bungee jumping **must have been seen** as a rite of passage.*

*Bungee jumping **might have been introduced** to the western world by Captain James Cook, though no one is really sure about that historical fact.*

You can use Simple Past modal verbs to convey certainty, possibility, or uncertainty about a past event or situation.

Examples:

- *To this day, some of the best jumps in the world **may be enjoyed** from these cliffs.*
- *This **may have been caused** by increased accessibility.*
