Let's Start!

Let's find out how athletes stay in shape!

Learning Outcome

Describe detailed facts about events or actions in work and social contexts, in written or spoken situations.

Ask your partner:

- What do you do to stay in shape?
- Do you follow a particular regimen?

Can Do Statements

- I can talk about sports and leisure time.
- I can express complex statements using words like *who*, *that* or *which*.
- I can talk about when something was done.

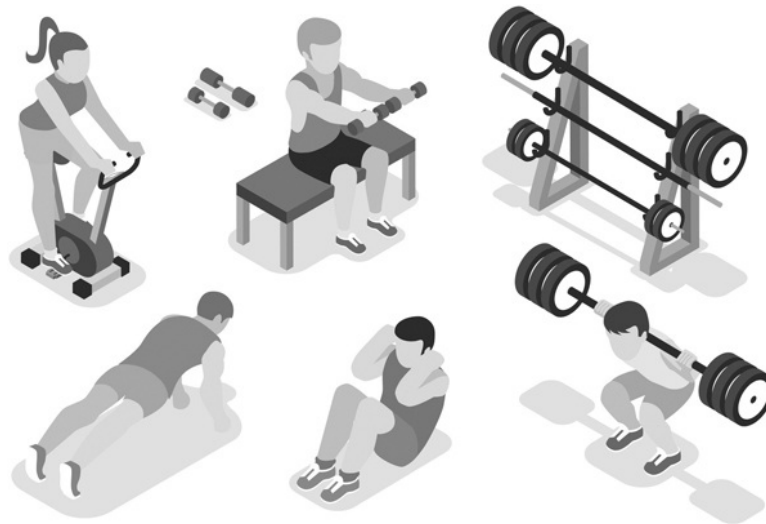

Let's Explore!

Getting a **leg up*** on the competition.

* To get a "leg up" on someone or something means to get an advantage.

Instructions: Read the text aloud.

Until fairly recently, athletes did not put much of an emphasis on physical fitness. Babe Ruth, the baseball legend who set the single-season home run record, was notoriously overweight. Batting champion Wade Boggs used to eat fried chicken before each game. And golfer John Daly would smoke cigarettes in the middle of a competition!

This all changed when athletes like Tiger Woods and Jose Canseco developed training regimens which gave them a competitive edge over their contemporaries. When Canseco, a baseball player for the Oakland Athletics, was training for the season, he would run several kilometers to the gym, do a full workout, and then run home. His physical fitness allowed him to possess the rare combination of power and speed that set him apart from the rest of the league. Tiger Woods also credited much of his early success to his dedication to physical conditioning. The increased body mass and strength that resulted from his training allowed him to hit the golf ball farther than any other professional golfer.

As soon as Jose Canseco and Tiger Woods started finding success, people who had never lifted a weight before began hitting the gym. Once this became the norm, those who had put off training got left in the dust. The era of the self-made athlete had begun.

In modern basketball, plyometric training has made it impossible for large, plodding giants to keep up with the sleek, well-conditioned youngsters who are currently dominating the league.

And the demanding training schedule that most hockey players follow has made the game bigger, faster and more exciting. The harsh truth is that if you're a 21st century athlete and you're out of shape, you're out of a job!

Adverbial Clause of Time

An **adverbial clause** is a group of words which have the same function as an adverb. Like all clauses, an adverbial clause has a subject and a verb.

Adverbial clauses of time are used to express when something happens or how often something happens.

You can use a **subordinating conjunction** like **after**, **as**, **as long as**, **as soon as** or **until** to introduce the adverbial clause.

Example:

*I'm going to register at my local gym **as soon as** I get paid.*

*I'll train **until** I start seeing results.*

Here are some conjunctions you can use in an adverbial clause of time:

after	no sooner than
as	since
as long as	until
as soon as	when
before	while

Examples:

- *Until fairly recently, athletes did not put much of an emphasis on physical fitness.*
- *As soon as Jose Canseco and Tiger Woods started finding success, people who had never lifted a weight before began hitting the gym.*

Learning Points

Defining Relative Clauses as Subject and Object

You use **relative clauses** to connect two different clauses into one sentence. **Defining relative clauses** provide information about a noun. This helps you know what noun the person is talking about.

Defining relative clauses are used either as a subject or as an object.

When it relates to the **subject** of the sentence, the **relative clause** is placed after the **subject** or the **object**. You must use the relative pronoun.

Example:

*I'm looking for a gym **that** is near my apartment.*

*The people **who** train at this gym are all athletes.*

When it relates to the **object** of the sentence, the **relative pronoun** can be dropped. Again, the clause can be placed after the subject or the object.

Example:

*The gym (**that**) I go to has recently shut down.*

*While I was at the gym, I met an athlete (**who**) I went to school with.*

Examples:

- *People who had never lifted a weight before began hitting the gym.*
- *The demanding training schedule that most hockey players follow has made the game bigger, faster and more exciting.*
- *Those who had put off training got left in the dust.*
- *Tiger Woods and Jose Canseco developed training regimens which gave them a competitive edge over their contemporaries.*
